= Barrido de armónicos en tremolo

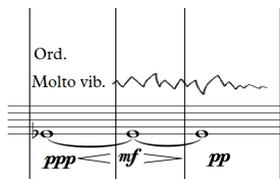

= Línea gruesa: Indica que el gesto se mantiene hasta donde finaliza dicha línea

= Barrido de armónicos naturales en doble cuerdas

= Caja de improvisación: La misma contiene gestos musicales, con información que el intérprete decide cómo interactúan entre si, por ejemplo en este gráfico se muestra un gesto de tino en doble cuerdas en las notas fa#(comenzando desde sol) y do (comenzando desde re), el intérprete decida la manera de transitar entre Ex. ponticello a Ex. tasto y entre las dinámicas que contiene la caja, la flecha circular indica que el gesto se repite sin silencios. Así mismo la caja puede contener una línea gruesa que indica que la misma se prolonga por el tiempo que indique dicha línea.

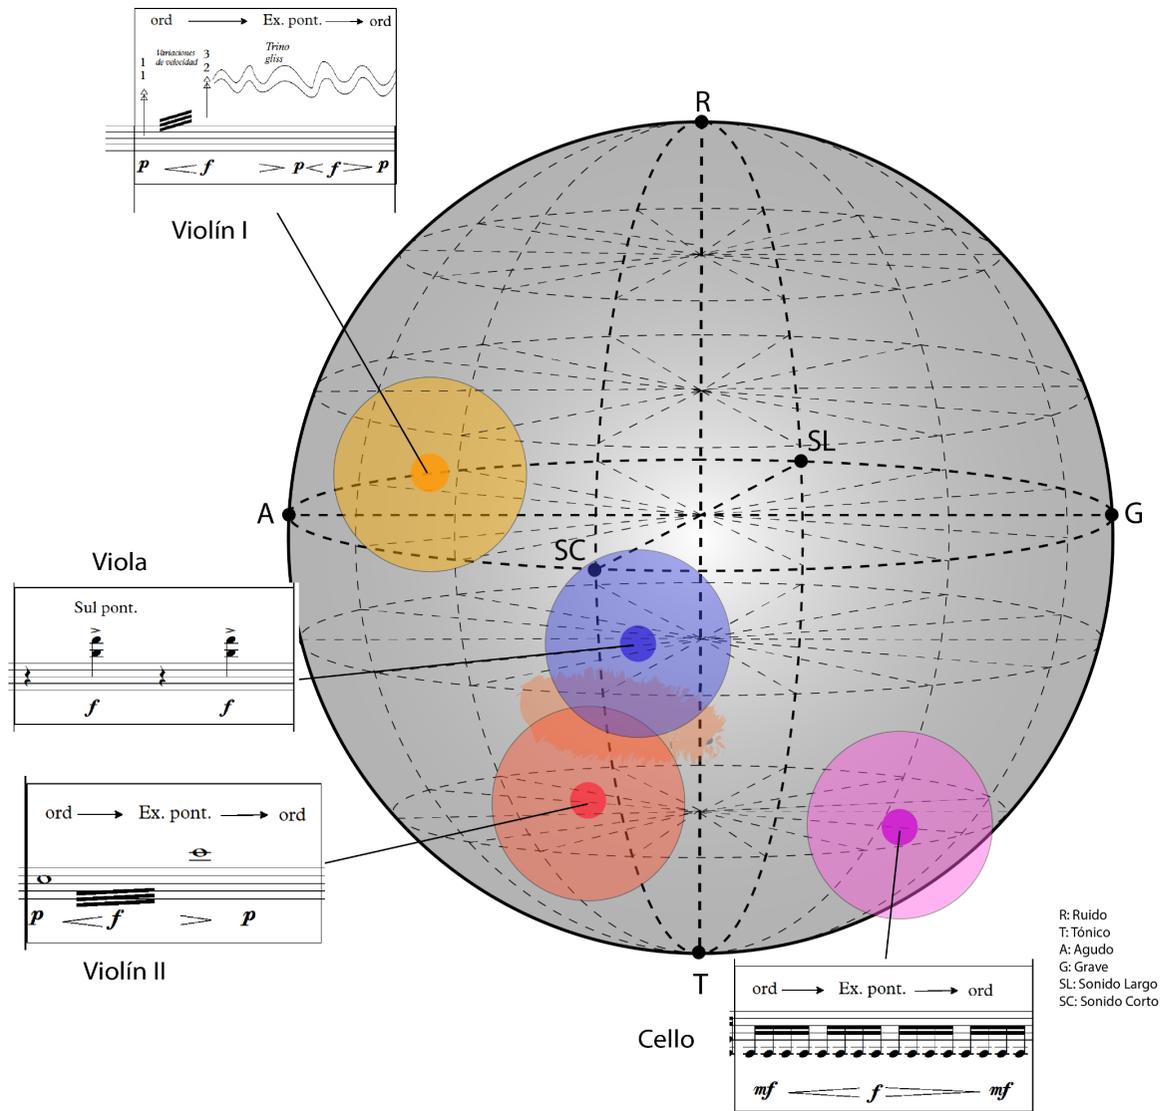

= Molto Vibrato: El dibujo indica o busca representar un vibrato exagerado y no regular.

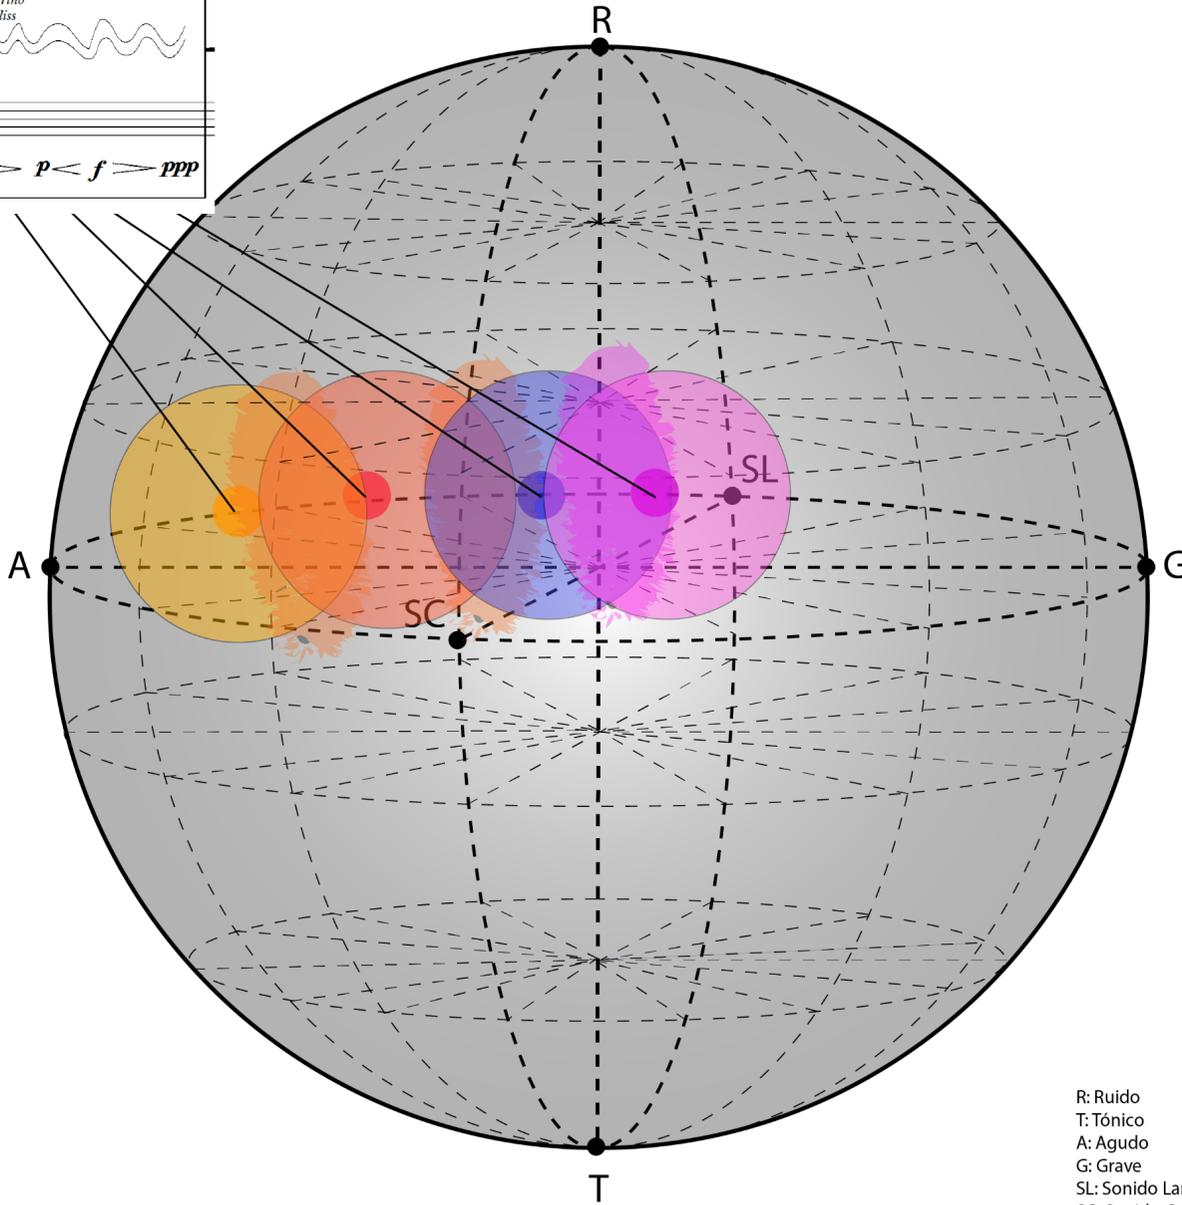

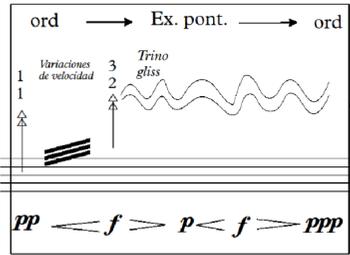

= Spazzolato: Generar sonido de ruido frotando el arco sobre las cuerdas muteadas.

En la semiosfera contenedora del c35, podemos observar las materialidades sonoras de cada una de las cuatro cajas de improvisación y su interacción en el espacio temporal. Violín I y Cello, se ubican en intersecciones opuestas de la semiosfera acústica, evidenciando sus singularidades propias, referidas a las materialidades compositivas de registro, ritmo y grados de inarmonicidad. Violin II y Viola, se sitúan en espacios de fronteras cercanas, dichas proximidades, refieren a parámetros sonoros de tonicidad, registro y se alejan entre ellas desde el parámetro de ritmo.

La semiosfera acústica, contenedora del compás 105, materializa gráficamente el alto grado de similitud sonora entre las semiosferas internas referidas a cada instrumento. Esto resulta en gran interacción de fronteras de las resultantes sonoras.

La semiosfera referida al c163, muestra de manera clara, los límites de fronteras entre las sonoridades de Violin I, Violin II y Viola, quienes, comparten cercanía por medio de parámetros sonoros como el registro medio/agudo y notas en común. El Cello, se encuentra distante de los límites entre fronteras, por medio de una operatoria compositiva particular, utilizando su potencialidad de registro grave, con la finalidad de liberar mayor cantidad de parciales armónicos en la textura.
